

A new level of InSight
into your inspections

A NEW LEVEL OF INSIGHT INTO YOUR OPERATIONS

Cenozon's InSight provides operators with a built-for-purpose tool for managing and interpreting In-Line Inspection data. With an interactive GIS interface, and streamlined data management, InSight will revolutionize your workflow.

Unprecedented InSight

InSight builds on Cenozon's experience with operation and integrity software. By incorporating advanced features such as Automated Multi-run Feature Matching, Analytical tools provide operators with the ability to perform cluster analysis, detect defect trends, and more. With InSight you can paint a detailed picture of what is happening throughout your entire pipeline network - inside and out.

MODERN SOLUTIONS FOR A MODERN INDUSTRY

"I am excited to be a part of the team developing a solution that will impact the future reliability of pipelines and make the job of managing pipeline integrity data easier and more cost effective."

– Nigel Smith, Senior Integrity Advisor, Cenozon

FEATURES & BENEFITS

Advanced analytical tools allow predictive interpretation of inspection data, so you not only what is happening now, but what could happen in the future.

GIS integration allows you to visualize your entire pipeline and riser network, and tools such as automated flyover help you see more than just data.

Automatic data processing allows for greater data reliability and increased confidence in data interpretation.

Comprehensive reporting tools help you to integrate InSight into your corporate heirarchy, and share analysis company wide.

INCREDIBLE CUSTOMER SUPPORT

Cenozon's InSight offers solid technology that's dependable and easy to use, but when you have questions or need customizations, Cenozon offers fast, helpful support. We're here when you need us.

DELIVERING INNOVATIVE PIPELINE SOFTWARE ON EVERY FRONT

Ask about Cenozon's comprehensive suite of software for oil and gas pipeline operators: Pipeline Integrity Risk Manager, Measurement Manager, Measurement Schematics, FIND, WildFire and HydroFlow. [LEARN MORE AT CENOZON.COM](https://www.cenozon.com)
